

Focus Your Attention

Custom & Standard Printed Slides & Plates

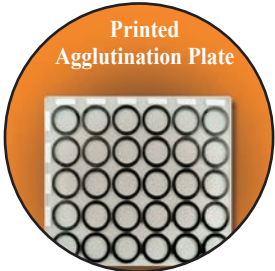

Target Successful Scanning

- Gram Stain, AFB or CytoSpin ... increase efficiency, trim learning curve by precisely framing sample in defined space
- Multiple samples per slide increases efficiency
- Avoid overflowing, imprecise grease pencils

Precision Customization

- Painless & straightforward design process
- Small commitment - 5 gross (720 slide) minimum
- Fast turn-around - less than 3 weeks
- Variety of glass quality, purity, thickness
- Multiple ink colors and types: hydrophobic, superhydrophobic
- Exclusive features: adhesives, ink wall height, drilled wells,
- Small features possible - as low as 50 microns

Printed Agglutination Plate

Resource for Rare Formats

- Individually-packaged sterilized microscope slides
- Glass Agglutination Plates 2"x3" or 6.25"x6.25" on 3.3mm thick glass
- Customized printed coverslips
- Electronics integrations designed for your application
